pizza express pizza. pizza express brighton. pizza express download app for free pizza. pizza express 11.95 menu

So worth the dollar you pay for it on sale. Even without a sale, its worth it. The gameplay is sooo addicting, and the little chats with NPC's are very well scripted and enjoyable.. Endless dialogues are so ing annoying. I just started playing this little gem and I already had tons of fun. Many options to expand your pizzeria and you even need some brains to figure out how much stock to keep at hand and how to price your pizzas. Much deeper than the childish look it might have on first look. And there are anthro characters. :D Also I'm really starting to want to know what happens in the story.. Great Game! Can play it for hours!. This is one of the most additive games you can play. Its deffenetly worth the price, in fact you get more. the developer is very active on forums and fixes bugs and crashes whenever someone reports it.. An incredibly fun and addicting game for anyone who is into cooking games, or tycoons/simulators. Here's a gameplay & review video that showcases all the features I'm going to talk about Pizza express gives you control over so many aspects that come with running a restaurant business. The details are what make the game so satisfying to play. You choose open and close times for the restaurant, cater to vegans and lactose-intolerant customers by creating pizzas with your own chosen ingredients, and purchase different types of advertisements that have different effects. For example, you can spam people's email inboxes for a cheap price, but it is frowned upon and won't be as effective as a giant billboard by the road. Although going into the game I wasn't expecting to be introduced to characters or story, they're actually very well written, engaging and fun to go along with. You have choices that branch the story's path, which makes the game even more interesting. Going back to the level of control the game gives you, bankruptcy is a thing that can happen in this game. If you aren't careful, and buy more ingredients, give out too many free drinks, and make too many mistakes, you CAN run out of money. If you're careful, it won't ever happen, but it's nice to know that your choices matter. There's so much to talk about, but I really think if you like the sound of what I've already mentioned, then you should give the game a try. One of my top 2 cooking/restaurant running games I've ever played.. Pretty much the restaurant management version of Dark Souls.. I am now ready to take on Dominoes and Pizza Hut
