Easy to pick up and hard to put down, **Raining Blobs** is an exciting arcade puzzler like the old **Dr. Robotnik's Mean Bean Machine** (or **Puyo Puyo**), but better. This game offers six difficulty levels and three different speed levels, along with a solo mode, battle mode (supporting up to eight players) and tournament mode.

To me, this is the best game in the genre since **Super Puzzle Fighter II** (1996), and I like how friendly or brutal it can be. Also, it's worth mentioning that there's a colorblind option, making the game accessible to everyone.

The anime appeal is a double-edged sword. I like it (and I'm sure there's a lot of people who'll discover the game because of it), but some people can mistakenly pass the game because of the girls. Either way, it doesn't really matter, since the player will be much more focused on the playfield.

All in all, I can't recommend **Raining Blobs** enough if games like **Puyo Puyo**, **Columns**, **Dr. Mario**, and even **Tetris**, are your cup of tea. For a small asking price, you'll get an addictive and very well made game to play alone and/or with friends - and you can even team up with CPU bots to get the co-op achievements!

10/10. Great party game (although you can play alone too), working fine on linux with controllers and/or keyboard.

You can add as many as 15 bots to play against, selecting their difficulty. There is also an endless and a puzzle mode (where you get pre-defined stages that you have to clear), everything can be played alone or with friends/bots.

Don't expect animated battles but the girls are cute :). 3 words to describe this game: Fun, Addictive, Competitive! My friends and I are having a blast playing this game, and it just gets better and better.

I have to say - The work done with the music and the art is just **FLAWLESS**. The visuals in general and & the retro style - combined with great effects are more than just eye candy.

You can never have 1 of your friends "just watching" - if you see you will want to play! And the fact that we can play up to 8 people is just wonderful.

GREAT GAME OVERALL!
THANK YOU!!

. I'm not sure. I would recommend this game because it is sweet and cute but I bought it on the assumption it was like super puzzle fighter. Now, although it is because it has the same mechanics, it just doesn't have the cosmetics and the fighting animations. You just send stars to your opponents. Great game though and happy to contribute, hopefully some updates in the future.. Wanted to play **Puyo Puyo**. Was highly expecting this was the same as **Puyo Puyo**. But a tweak in its gameplay (colors need to have stars first before they can be popped) ruined it for me. Not that I don't like a new challenge, it's just that I want to play **Puyo Puyo's** gameplay as it is. So yeah, I refunded.

But yeah, for those less lazy than me, cool game.. It took me a while to get to grips with the controls and the fast pace is rather intimidating, but it makes it a challenge.

I love the art style and the hilariously awful dialogue in tournament, which contains such gems as 'Will play my violin with you' and 'You have eyes but you are blind'. The gameplay is addictively brutal.

If you like puzzle games then go for it!

Simple to play and great fun, very addictive, this is a genre that has been forgotten for a long time. Incredible Dev support, You can play with up to 8 friends simultaneously! A must in your library. This game is exceptionally well polished, but it doesn't really explain to me what I'm supposed to do.

Local 2 Player which works wonderfully from a technical perspective was boring to me and my friend because we sat there dropping blobs endlessly until we quit out of boredom... what is supposed to be so satisfying about this... I don't know... maybe they need a better tutorial and strategy guidance for newer players.

If you are a real strategist and already know these games I'm sure you'll like this one. If you're newer to the genre then pass on this one because the game isn't really fully formed and self-contained for a player coming with no experience like myself.

edit: Upon reflection I decided to flip the thumb up. If you read what I wrote and you still buy I'm 100% sure you will love the game.

edit2: Look at the comments to this review... The dev is right here minutes after I posted this trying to help me out. What more do you need to know? I'm more confident in a thumbs up than even before. I'll move this out of my Hidden Games and into my "waiting" folder to see what future updates bring in terms of helping me learn.. Would be great if it worked.. Fresh, fast paced, and very fun! It's a blast against other players.. It's essentially Puyo Puyo, a game with an already fun and simple formula, and adds a cute art style, a quite decent soundtrack, and a couple of twists to the gameplay that makes it faster-paced, more strategic, and more fun. In addition to that, who doesn't love achievements and trading cards? If you're a fan of those kinds of puzzle games, love playing 1v1 against a friend, or want a small arcade-style puzzle game to kill a few minutes with, this game is a great choice!
